AGM technology

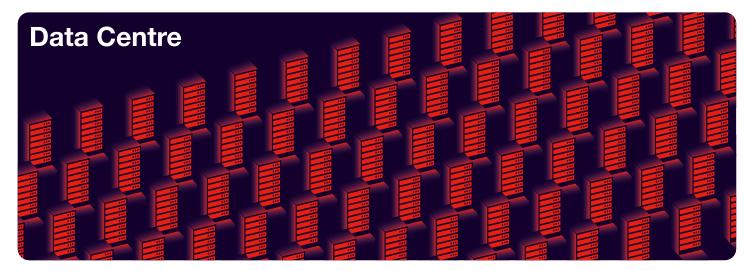

High-rate performance

Flame retardant casing

10/12 years design life enclosed in a rugged flame retardant ABS case and available with top and front terminal designs.

The FLB is one of our most popular battery and is used extensively in many applications including UPS backup power. The battery is designed to deliver the highest levels of performance. The high energy density construction in a compact design also helps to reduce costly installation space.

The exterior construction uses a Flame retardant ABS plastic to UL94 V0 (LOI greater than 28%) - this guarantees a high level of safety and

superior thermal stability to avoid case bulging.

The FLB range is based on AGM VRLA technology and it is 99% recyclable at the end of life. The battery is fully maintenance-free and requires no routine topping-up of the electrolyte. The range carries a non-hazardous designation and can be transported by road, rail or air. The design has been optimized to lower self-discharge during storage.

Battery type	Nominal voltage (V)	Nominal power (W/cell)	Nominal capacity (Ah)	Nominal capacity (Ah)	Nominal dimension (mm)			Typical weight
		15MIN 1.67VPC 25°C	10H 1.80VPC 25°C	20H 1.75VPC 25°C	Length	Width	Height	(kg)
